	Date	4 th July 2018
	Effective	Immediate
	No. of Pages	One

**2018 FMSCI General Prescriptions Drag Racing
2018 4W Technical Regulations Drag Racing
2018 Two Wheeler Technical Regulations Drag Racing**

Add the following new Article to the above Regulations:

Brake Light

Every competing vehicle shall compulsorily be equipped with at least one functional and clearly visible brake light located at the rear of the vehicle and activated solely on the actuation of the brake pedal/lever and by no other means.

Every competitor, on the crossing of the finish line, shall apply brakes to slow the vehicle down.

Any competitor who does not do so, as evidenced by the lack of illumination of the brake light, shall be disqualified from the run and will be reported to the stewards.

The working of brake lights shall be checked at the Start Line and the start shall be refused if the brake lights are found to be non-functional.

Reason

It has been brought to the notice of the FMSCI that although competitors are expected to brake after the finish line of the run, there are many competitors who fail to do so, resulting in serious safety concerns.

Therefore, the above additions are made to the General Prescriptions and the Technical Regulations of 4 wheelers & 2 wheelers.

This bulletin is issued on safety grounds and shall come into effect with immediate effect.
