

FMSCI GENERAL PRESCRIPTIONS FOR DRAG RACING 2024

HEADING : EVENT REQUIREMENTS

Existing :

NUMBER OF RUNS PERMITTED PER DAY

- The Maximum number of runs per day will be 200 Runs which includes practice.
- An additional 25 runs per day may be granted by the Stewards if they are satisfied that the program can be completed in daylight.
- The practice run will also be counted as part of the Maximum number of runs per day.

Thus, if the Maximum runs post the Stewards approval is 225 runs per day, the Organizers need to calculate their cut off for the entries after taking into account that each entrant will also be given a compulsory practice run. If the entries are more than the maximum runs permitted, then either the event has to be for 3 days or the number of entries restricted to the maximum number of runs permitted over 2 days.

Amended :

NUMBER OF RUNS PERMITTED PER DAY

- The Maximum number of runs per day will be 200 Runs which includes practice.
- An additional 125 runs per day may be granted by the Stewards if they are satisfied that the program can be completed in daylight/lighting conditions are conducive to drag racing
- The practice run will also be counted as part of the Maximum number of runs per day.

Thus, if the Maximum runs post the Stewards approval is 325 runs per day, the Organizers need to calculate their cut off for the entries after taking into account that each entrant will also be given a compulsory practice run. If the entries are more than the maximum runs permitted, then either the event has to be for 3 days or the number of entries restricted to the maximum number of runs permitted over 2 days.
